

A little over a year ago, Erik brought the Zipper proto-type into our store for us to demo. He wanted our opinion on his new product. We hooked the Zipper up to a Power Clean Unit. My first thought was, "What kind of drag wand is this?" After a few strokes, I realized it wasn't any kind of drag wand at all. It was incredible, unique, & I knew others had to try it. It was easy to operate and the carpets dried very quickly. A few months ago, Erik re-visited our store with his finished product and dropped one off with us to use. By watching the air-flow through the lexan glass, I quickly realized why the carpets dried so fast and how pressures could be increased for better agitation. The Zipper doesn't put excess strain on your back. During operation, you stand in an upright position, so your back is not hunched to one side. The best feature of the Zipper is the amount of Sq/Ft you can clean an hour. As we all know, "time is money." I would not do a large commercial job without it. The results are mind-blowing. We hold many different Certification Courses in our store and we demonstrated the Zipper to see what other carpet cleaners thought. They couldn't believe the results and how easy it was to use. It makes the newest technicians look like a professional carpet cleaners immediately. The Zipper truly is a great product and a lot of carpet cleaners could benefit from using this tool!
