Erik,

What can I say about the Zipper? It has so many advantages. We use it on every job we do now. I liked it so much I bought a second one within the first month of the first unit.

I enjoy cleaning again that's for sure, big rooms don't seem that big and my shoulder does not hurt anymore either. We have a rotary extractor and I would much rather use the Zipper. I don't need to cut in all the edges anymore (of course some we do) and I don't groom the carpet only to find out there were some streaking issues. The rotary could never clean the commercial jobs like the Zipper. And I don't want some light weight tool that just glides over the surface either; the Zipper gets in there and cleans like a big dog without me being the big dog.

It has cleaned every carpet type and style very well with better dry times then before. My front porch has an old true indoor/outdoor carpet and I have never seen it come out so well. One school we clean every year took an hour longer this year single wandling with the Zipper, versus dual wandling before, but here is the kicker I had one less employee on the job. That is huge!

We are a very quality focused company and very picky about a lot of things we do, this tool gives us the quality we want, the dry times we want and is saving us time. We clean with both a Vortex and Prochem unit and now I feel confident using both machines that the cleaning is equal on all jobs.

Thank you Erik for building this great tool, I truly think it is the best investment I have ever made in my company in a long time. I wish this tool had been around before buying other machines and tools that claimed to save so much time and money but never really did.

Thanks Again!

Jesse Clark

P.S. All of my employees love it!
